I really enjoyed this class. Taylor is a very effective, understanding, and easily accessible teacher. I really appreciated his willingness to help me without ever making me feel stupid. He was always prepared for class and made the material stimulating and interesting. I do not have many complaints about Taylor or the class in general.

Taylor is a phenomenal teacher. He is personable and tries to build a strong relationship with his students. He makes regular moments into teachable moments, and he is always able to answer questions regarding class or lab. He works to make his students successful and has inspired me to pursue a GIS certificate.

Taylor is a wonderful instructor, and made the course pleasurable. He always made an effort to help the students.

Taylor was a great instructor, i really think this course could benefit from being multiple days and following a normal schedule

Taylor was the nicest, most respectable teacher I have ever had in college. He talked to you as an equal, instead of speaking down to you. In my case, it actually made me work harder in order to do well for his sake, and so that I wasn't wasting his time.

I think it may have been beneficial to have more labs with more types of data. There was more than enough time to complete the labs and we probably could have done once a week.

Super helpful!

Taylor is awesome!

Taylor is awesome. He was always extremely helpful in labs and was very passionate about what he does. He always knew how to solve any issues with mapping software. He was also one of the most approachable instructors I've ever had; he was easy to talk to and never made you feel dumb for asking too many questions.

taylor is the man hire him and you won't regret it

Taylor is very informative. He is very good with communicating his points to students, and really anyone he talks to. If he didn't have an answer to one of our questions, he would find out. If he were a professor, I'd take him!

Taylor really made this class enjoyable to go to. He was always helpful and never made me feel silly even when I may have asked some easy questions and needed extra help. He never held our hands nor did he ever give us answers, but he was always willing and eager to help. He should be very proud of himself and confident in his ability to teach. Confidence is my only recommendation. He has been my best TA that I have had all throughout my 4 years of college at UGA.

The instructions in Lab 2 on how to add a CSV file are incorrect. A correct version should be posted online.

My TA was always helpful and friendly. I always felt like I could ask questions. When I did ask questions, my TA gave me very good feedback and understood all of the programs very well.

TAYLOR IS THE BEST TA I HAVE HAD AT UGA SO FAR. He is down to earth and ready to help at any given second. He knows his stuff. He loves what he does and loves sharing what he knows in such a simple way. There were many moments that I got overwhelmed or did not understand something right away, but he right there and so helpful when I needed him.

Good instructor, made you learn the systems in an effective way.

Real G's move in silence, like lasagna. Taylor is a baller with major GIS swagger. Somebody get this man a medal

Taylor was a great lab instructor! He was flexible and very helpful! He was willing to go beyond to accommodate students and make sure they were able to complete the assigned material

Taylor was always extremely concerned with his students' needs, and always did a great job of explaining what to do and helping enthusiastically for a very complicated software that. It is clear the patience he has for students, we had to ask him so many questions and to sometimes figure out difficult technical problems with our computers.

Taylor was an awesome TA! Very personable and helpful with all questions. You could tell he wanted everyone to learn and succeed.

Taylor was very difficult. When i asked questions i felt he wasn't interested in helping me but was more than willing to help the students with previous knowledge of this course and software. The entire lab was very difficult for me and Taylor did not help that.

Very helpful about teaching us how to do the labs. I'm technologically inept and Taylor was very patient with me. It was appreciated.

Enjoyed the course!
Really enjoyed the class!
Taylor did a great job leading the lab. It helped that he always seems happy to be there and happy to help! I liked that we were guided through the first few labs and we gradually had to work more independently and start to figure things out ourselves. I think getting to do the last lab on our own helped make us remember the mapping programs and tools.
Taylor has been very helpful in lab and in class. A+
Taylor really went out of his way to help students in lab. He was always reachable - even during the holiday - and often stayed after class time to help out. Best TA I've had in my 3 years at UGA!
Taylor was awesome. He was a very good teacher and I'm happy that he took so much time writing the Labs and making sure the students understood what was going on. I felt bad because the teacher interrupted him sometimes (a lot) but he always remained smiling and continued on. I hope he continues teaching- He'd help out a lot of students.
